

# Identity

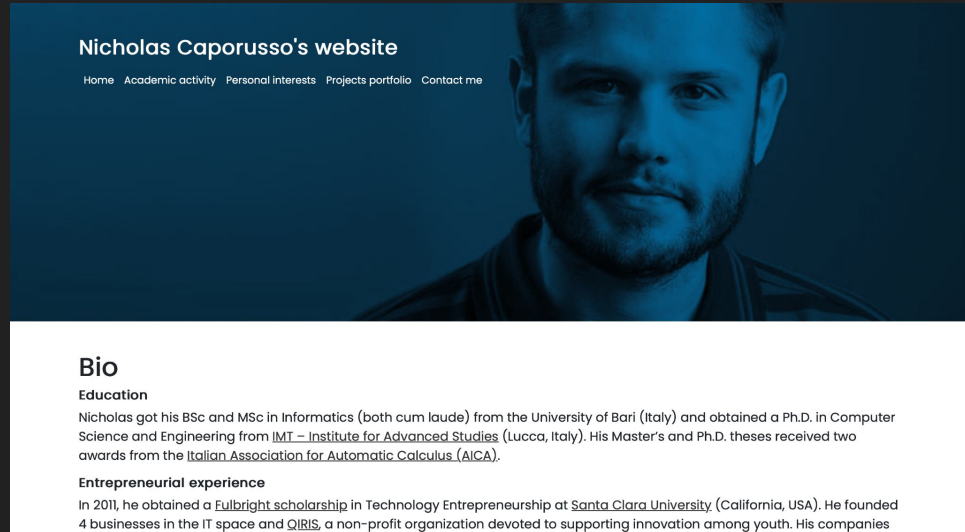

- This website is going to be a personal professional website that ill use to talk about my interest and show off some of the projects i've done
- Who
  - This website is for possible future employers to see
- Why
  - So they can easily see what I know how to do and get all the information quickly and simply
- How
  - I'm going to show myself as professional and calm with a chill demeanor to relate with them
- What
  - This website will have my contact information my interest/hobbies and a portfolio of my projects and an up to date resume

# archetype/color/font

- Sage
  - I chose sage because it represents wisdom and intelligence and that's what I want to represent me
- Color
  - I went with a white and black and some grey because I wanted the site to be professional and calming
- Font
  - I went with arial because it is easy to read and understand and very professional
